Previous occupations of Lunatics (including criminals) admitted into the Asylum . . . 286 3. Types of Insanity of Lunatics in Asylum . . . 288 4. Aetiological factors and associated conditions in the patients admitted into the Asylum . . . 289
SECTION XXII. RAINFALL AND TEMPERATURE.	<ul style="list-style-type: none"> 1. Normal and District Average Rainfall (by districts). . . 294 2. Normal and Actual Rainfall (by Taluks). . . 295 3. Normal and Actual Rainfall during Various Periods (by districts) . . . 304 4. Do (by taluks) . . . 308 5. Monthly Average Rainfall per district (Dominions, Districts and Taluks) . . . 322 6. Monthly Weather Report,—Temperature and Humidity of the Chief stations in Hyderabad State . . . 328 7. Rainfall during various periods for the Agricultural year . . . 332 8. Monthly statement of Rainfall in the year 1344 F. . . 334 9. Average Rainfall by Monsoons in the calendar year 1344 F. . . 336
SECTION XXIII. a-SEASON AND CROP REPORT.	<ul style="list-style-type: none"> 1. Season and Crop report for 1348-44 F. (1934-1935 A.D.). . . 338

	TABLE NO.	PAGE
	1. Total area and classification of area in acres	350
	2. Area under irrigation in acres.	351
	3. Area under crops irrigated	352
	4. Total Area under Crops with Total Yield of Principal crops below the area	354
SECTION XXIII. AGRICULTURE (GENERAL).	5. Standard (Normal) Yield in pounds per acre of the Principal Crops in each district (Dr. Mann's)	358
	6. Area Surveyed and Assessed	360
	7. Strength and Cost of the Agriculture Department	362
	8. Total area (in acres) sown with Kharif, Rabi, Baghat and Abi crops in each district	366
(a) COTTON MARKETS, ETC.	1. Nander Cotton Market rates on Tuesdays during the Marketing Season	372
	2. Jalna do do	376
	3. Cotton bales exported by rail and road	377
(b) MONTHLY REPORT ON COTTON 1344 F.	1. Cotton report for Azur 1344 F.	380
	2. Do Dai 1344 F.	381
	3. Do Bahman 1344 F.	383
	4. Do Isfandar 1344 F.	384
	5. Do Farwardi 1344 F.	386
	6. Do Ardibehist 1344 F.	388
	7. Do Khurdad 1344 F.	389
	8. Do Thir 1344 F.	391
	9. Do Amardad 1344 F.	392
	10. Do Sherewar 1344 F.	394
	11. Do Mehri 1344 F.	396
	12. Do Aban 1344 F.	398
(c) CROP FORECASTS FOR 1344 F.	1. Cotton Forecast and Area and Outturn	402
	2. Wheat do	404
	3. Rice do	406
	4. Jawar do	408
	5. Sesamum do	410
	6. Linseed and Mustard do	412
	7. Groundnut do	415
	8. Castor and Miscellaneous do	417
	9. Sugar cane do	420
	10. Tobacco do	422
SECTION XXIV. LIVE-STOCK.	1. Live-stock, ploughs and carts	426
	2. Proportion of serviceable males (Livestock) to females (livestock).	430
	3. The Average No. of Cattle per sq. mile and the Proportion of bul- locks and he-buffaloes to 100 acres of Occupied Land and to Pattadars	431
	4. The average No. of cattle, carts and ploughs per 100 of population	432
	5. Cattle Mortality (Oxen)	433
	6. Do (Buffaloes)	434
	7. Do (Sheep, goats and horses)	436
	8. Do (Contagious diseases)	438
	9. Strength and Cost of the Veterinary Department	440

	TABLE NO.	PAGE.

PREFACE

A "Statistical Year Book" for the Dominions of His Exalted Highness the Nizam, on the model of the Statistical Abstract for British India and the book of like description published by the self-governing Dominions of Australia, Canada and New Zealand, has been the aim of the Department of Statistics, for some time. While endeavouring to collect statistics for the second volume of the decennial "Statistical Abstract" and "District Gazetteers" it was thought desirable to enlarge the scope of the former. As a first step in that direction, standard forms drawn up on the lines of the British India Statistical Abstracts were supplied in duplicate to all the Government and *quasi*-Government Departments requesting them to furnish statistics, one set for the years 1331 to 1340 Fasli and another for 1341 to 1344 Fasli. They were also requested to keep supplying annual statistics at the end of every Fasli year. Many departments failed to furnish statistics and so a touring party visited the different district offices for detailed statistics and another the head offices in the Capital. In spite of such special efforts, the statistics received are still incomplete. Retaining the first set of figures (1331 to 1340 Fasli) for the second volume of "Statistical Abstract" the second set of statistics (1341 to 1344 Fasli) so far as they are available are set forth in the present issue of "Statistical Year Book" which is the first of its kind. In future "Agricultural, Industrial and Trade Statistics" which in 1343 Fasli reached its seventh number will not be published as all such statistics will be incorporated in the "Year Book". The value of the "Statistical Year Book" cannot be overestimated. With the expansion of education, trade and industry the thirst for upto date statistical information is growing and the Year Book not only obviates the necessity of having to consult different publications of the different departments but contains figures not available in the usual departmental reports.

MAZHAR HUSAIN, M. A., B.Sc.,

Director of Statistics.

Dated 28-12-1345 Fasli.

SECTION XXII—(a)

Season and Crop Report for 1343-44 Fasli

SEASON AND CROP REPORT

1343-1344 FASLI (1934-35 A.D.)

This report deals with rainfall, agricultural and market conditions during the year ending 15th Thir 1344 Fasli.

Agricultural conditions during the year were less satisfactory than in the preceding year. The showers, which usually fall in the latter half of Thir, as a prelude to the south-west monsoon, were very insignificant, there being only 9 cents during the fortnight. The monsoon itself arrived late and did not manifest itself effectively till the end of Amardad (beginning of July). Kharif sowings, which generally commenced with the pre-monsoon showers in some places, did not begin till the second week of Amardad (June) and that too sparingly. The vagaries of the monsoon in its early stages were marked in parts of Marathwara Rainfall, on the whole, was illiberal and unevenly distributed. These causes contribute to a fall in acreage and outturn of rain-fed crops in a general way. A redeeming feature, however, of these factors was the appreciation of the retail prices of rice and jawar; but the price of wheat, due to extraneous circumstances, noticeably depreciated.

(a) *South-West Monsoon of 1343 Fasli.*
(16th Thir 1343 to Aban 1343 Fasli).

During the first three weeks of Amardad (June) it only drizzled in most parts, the weekly average fall amounting to a few cents. Consequently the sowing operations of kharif andabi crops were held up in certain areas. The rain, which fell up to the 25th Amardad, was deficient in every district. it being as much as three inches below normal in Medak and Nizamabad. Anxiety was felt for the seed already sown. Subsequently the monsoon became active and yielded the much-needed rain. Although it was light to moderate over a large area, it helped to relieve anxiety. Sowing was resumed and the early sown crop was seen coming up above the ground. Scarcity of water and fodder

experienced in some tracts was mitigated to a certain extent. It continued to rain, more liberally in Telingana, Adilabad receiving $6\frac{1}{2}$ inches in a week, while Raichur registered only 90 cents.

At the end of the first month (Amardad) of the monsoon the rainfall had averaged 6·20 inches, or 1·10 inches less than that registered during the same month last year and 72 cents more than normal. The districts which showed a deficit were Baghat, Medak, Aurangabad, Osmanabad, Bidar and Bir. Gulbarga and Raichur had approximately the same as normal.

The first week of Shahrewar (July) was characterised by strong high winds and light rains averaging 1·65 inches. The soil moisture in Marathwara districts was inadequate and the general weather conditions were not favourable for a normal growth of the tender crop or for the germination of the late sown seeds. A general need of rain was, therefore, expressed in Marathwara. During the whole of the following week, the monsoon held off, except for 14 cents of rain, at a time when sowing was well under way and the early sown crop reached the first weeding stage. The situation caused some anxiety in parts of Karimnagar, Aurangabad, Bir, Gulbarga, Osmanabad and Raichur, where the tender crop began to wither. Subsequently, though the monsoon strengthened, the fall was unevenly distributed so that more rain was in demand in Bir, Gulbarga and Raichur districts, most especially in the last, to sustain the languishing crop and to complete sowings.

Before the end of Shahrewar, however, moderate to heavy rain fell, the highest amounts being 13·19 inches in Ambad (Aurangabad) and the lowest 1·21 inches in Huzurnagar (Nalgonda). It rained heavily in Raichur, which during the last week of the month, registered 6·30 inches. By this substantial fall the moisture need of the crop in this district was more than met. From the beginning of the monsoon to the end of Shahrewar the total fall for the Dominions averaged 17·23 inches, as compared with 12·08 inches normal for the two months. Abnormality was most marked in Bidar (7·70"), Nander (6·76"), Osmanabad (6·51"), Parbhani (6·30"), and Mahbubnagar (6·10"), Raichur had 4·53" above normal for the period.

Early in Mehir (August) only light showers fell. It was a welcome change in the low-lying tracts, where the heavy and continuous falls of the preceding week were tending to discolour the crop, but the period of slackness was brief and the monsoon renewed its activity and rained heavily in many regions: Kannad (Aurangabad) recorded 13" while Karimnagar, Adilabad and Warangal districts had 5 inches each. In these parts such heavy falls interrupted seasonal field work and a break was desired, but in some others such as in Shahpur (Gulbarga) and Sindhnur (Raichur) only sporadic showers fell and moisture being already impoverished, crop showed signs of distress. For a fortnight thereafter a spell of warm weather with occasional light showers prevailed. Crop in places, where excessive soil moisture was injurious, improved but in droughty tracts suffered. Before the end of Mehir a change in the weather conditions resulted in widespread rainfall; light in Gulbarga and Raichur and moderate elsewhere. More rain was imperative in parts of Shorapur and Shahpur (Gulbarga) and Gangawathi and Sindhnur (Raichur), where crops continued to wither.

Since the beginning of the monsoon 23·51" had fallen, as compared with 23·67" in the same period in the preceding year and a normal of 17·08". Osmanabad was 8·77" in excess of normal, Warangal, Karimnagar, and Bidar 8½" each, Nander 8", Gulbarga 1" and Raichur 3".

The monsoon was inactive in Aban (September) the last month of the season. For three weeks only light and scattered showers fell at long intervals. Consequently when grain was ripening, soil moisture had almost exhausted in some parts of Medak, Nizamabad, Mahbubnagar, Bir and Nander, while in a few parts of Nalgonda, Gulbarga and Raichur crop continued to wither. The monsoon in its retreating stage yielded some showers, which, in places, were very meagre.

Thus the south-west monsoon of 1343 Fasli accounted for an average of 27·84 inches, as compared with 31·69 inches in the same period last year or 3·64 inches above normal but Baghat was nearly 3 inches, Raichur 1·28 inches, Gulbarga 20 cents and Nalgonda 10 cents short of normal.

(b) *North-east monsoon of 1344 Fasli.*

(Azur 1344 to Dai 1344 Fasli).

The north-east monsoon was uneventful. The average fall was nearly 3 inches, the same as for the previous 14

years. In parts of Raichur district it rained liberally during the last week of Azar (October 1934). The share of the Gangawathi taluka of the same district being 8 inches, it ameliorated the condition of the standing crops there. In the first week of Dai (November 1934) a few showers fell and interfered with the crops under harvest.

(c) *Intermediate period* : (Bahman 1344 to Thir 1344 F).

The subsequent weeks until the end of Isfandar (January 1935) were practically dry and the season was favourable for cotton picking and harvesting of kharif and abi. The moisture needed for rabi was adequate except in parts of Raichur and the crop was weeded at intervals. In parts of Raichur crop began to wither and in a few areas of Aurangabad, Bir, Mahbubnagar and Gulbarga it suffered either from cloudy weather, plant disease or severe cold.

The last week of Isfandar 1344 Fasli (January 1935) and the first week of Farwardi (February 1935) saw some light showers accompanied by hailstorms in parts, which slightly damaged rabi in the harvesting stage.

Khurdad (April) was showery in parts and hailstorms were reported from Medak, Mahbubnagar and Karimnagar, where tabi under harvest was affected a little. This was nearly dry and weather ideal for tabi harvest. The total fall registered in this intermediate period averaged 2.27 inches.

Kharif.—The Kharif season was eventful. There being ^{cro}no pre-monsoon showers, sowing commenced a fortnight later than usual and protracted till the first week of Mehri (August). Indifferent weather conditions did not warrant cultivation on as wide a scale as in the previous year. At the initial stage the area sown to cotton was 70 per cent., to jawar 25 per cent., to castor 21 per cent., and to miscellaneous oil seeds 61 per cent. less than in the corresponding period of last year.

Owing to poor rainfall at sowing time much concern was felt for the seed sown in a few areas of Karimnagar, Mahbubnagar, Nalgonda, Aurangabad, Raichur and Bidar. Though it germinated satisfactorily an average fall of 48 cents in the 3rd week of Amardad was of little use. The

sprouts appeared in weak condition. Further sowing was impeded. The need for more adequate rain was urgently felt in some tracts of Adilabad, Mahbubnagar and Raichur.

When the crop reached to the first weeding stage in the second week of Shahrewar (July) there was practically no rain and it began to wither in some places of Karimnagar, Aurangabad, Bir, Gulbarga, Osmanabad and Raichur. At the same time insects appeared and ravaged the tender blades in parts of Jagtiyal (Karimnagar) and Gangawathi (Raichur). A week later some tracts of Warangal, Karimnagar and Mahbubnagar also reported insect menace. Crop in Yadgir (Gulbarga) was subject to a plant disease and castor in Nalgonda and Mahbubnagar suffered from cut worms. Thus the kharif crops which resiled from many such adverse circumstances suffered again from heavy rains in parts, once at the end of Shahrewar (July) and again after a week's interval, in Mehir (August). Though insect attack subsided in the heavy rains the crop in a few low-lying tracts was partially submerged and the final weeding operation was interrupted.

A break in the monsoon then ensued and the prospects of the crop improved ; but the spell of warm weather being a little too long, the condition of the crop in parts of Gulbarga, Raichur, Nalgonda, Medak and Mahbubnagar declined more seriously in the first two districts.

Harvesting commenced at the end of Aban (September) and terminated in the first week of Isfandar (January), the normal reaping season being middle of Azar to end of Dai. Final picking of kharif cotton continued till the beginning of Farwardi (February).

Abi.—Due to poor rainfall abi sowing was deferred till the fourth week of Amardad (June) a fortnight later than usual and continued in parts till the end of Mehir. Seedlings were ready for transplantation after a month. The crop under irrigation sources grew satisfactorily but that in uplands, which depended on rainfall, was in an unsatisfactory condition for lack of moisture. In some tracts of Warangal and Karimnagaroppers attacked the crop and did some damage. The rain which fell in Mehir was useful and enhanced the prospects of the broadcast crop. Water-supply in tanks was replenished and irrigation was easy to get. But insect menace persisted in Karimnagar

and plant disease was widespread in Medak and Nalgonda. Early in Azur 1344 Fasli (October 1934), early sown paddy was reaped in parts, while in some places of Karimnagar, Mahbubnagar. Medak, Baghat, Gulbarga and Raichur the crop in maturing stage suffered from lack of moisture until moderate to heavy rains came at the end of Azur. In the first week of Isfandar abi harvest concluded.

Weather conditions seemed favourable and rabi cultivation began in the last week of Mehri (August) three weeks ahead of the usual date (middle of Aban) in parts of Mahbubnagar, Nalgonda, Gulbarga and Raichur, and continued till the end of Azur. In some tracts of Raichur scanty falls of rain did not permit of cultivation in all the available rabi area. For the same reason sowing was interrupted for one clear month, between the end of Aban and the end of Azur. During the period of drought, early sown crop withered. Again when the weeding stage arrived the crop in certain regions of Gulbarga and Raichur stood sorely in need of moisture. Thus the absence of timely and adequate rains generally militated against rabi in Raichur. In a few parts also of Mahbubnagar, Gulbarga and Aurangabad, the crop suffered either from lack of moisture, plant disease or severe winter. Harvest began in the middle of Isfandar (January) and continued uninterrupted, except by a hailstorm early in Farwardi (February) in some regions of Adilabad and Osmanabad.

Tabi sowing commenced three weeks earlier than usual in Telingana, in the first week of Bahman 1344 Fasli (December 1934), and continued till the third week of Isfandar. The crop was weeded and irrigated in the usual course and had fairly normal season, except for a disease peculiar to tabi in stray parts of Medak, Nizamabad and Nalgonda and insect pests in Mahbubnagar. Harvesting was done between Khurdad and Thir.

The area and outturn of principal crops harvested during the year under review are as hereunder :—

	AREA IN ACRES		YIELD IN TONS

*Bales.

Agricultural Stock

Water and fodder supply was reported to be generally adequate in Mehir and Aban 1343 F. and Azur 1344 F. During the other months scarcity was felt in a few parts, more keenly in Gulbarga and Raichur. Fodder shortage was pronounced in parts of as many as 13 districts during the first three weeks of Shahrewar (July) 1343 Fasli. Contagious diseases among cattle were prevalent in places of many districts throughout the year under review, Isfandar being the only healthier month.

Grain Market

The retail price of wheat which was $8\frac{1}{2}$ seers at the beginning of the year appreciated to $8\frac{1}{4}$ seers in Azur and declined to $8\frac{1}{2}$ seers in Bahman. The price further dropped by small degrees and touched $9\frac{1}{4}$ seers when the year under report closed.

On the other hand the prices of rice and jawar, which stood at $8\frac{1}{4}$ and 16 seers respectively per O.S. Rupee at the beginning of Amardad advanced to $7\frac{1}{4}$ and $13\frac{1}{2}$ seers respectively at the end of the year.

Rainfall and seasonal conditions from 16th Thir to end of Aban 1344 Fasl.

(a) *The South-West Monsoon* :—The south-west monsoon burst in proper time, in Amardad 1344 F. (June 1935), the northern parts of the Dominions receiving moderate to heavy falls in Amardad (June) and Shahrewar (July) Then followed three weeks of light showers. The monsoon thereafter strengthened but distribution of rain was defective. In some parts of Warangal, Karimnagar, Nizamabad Nalgonda and Raichur more rain was urgently required, while in certain tracts particularly in Nander and Bidar the fall was so continuous and heavy that the standing crops were discoloured.

The average for the south-west monsoon was $28\cdot96''$ as compared with $27\cdot25''$ in the same period last year and $25\cdot26''$ normal for 14 years.

The winter months were ideal for the growth of rabi crops.

Kharif :—It was sown early in Amardad (June) under Crop ideal conditions. The showers in Thir (May) were of use for the final turning of the sod. Early in Amardad (June) rainfall was general, Aurangabad registering $8\cdot25''$, and sowing began in Karimnagar, Mahbubnagar, Nalgonda, Aurangabad, Raichur and Bidar. The other districts followed the monsoon advanced but in certain tracts of Nalgonda seeding operations were suspended for a time owing to deficient rains. It continued to rain in Shahrewar (July). The excessive soil moisture affected the crop in tracts of Parbhani, Nander and Bidar, but Raichur went dry; in the first week the crop began to wither and an attack of caterpillar was reported. It received a few falls subsequently. The need for more rain was greatly felt in that district as well as to some extent in parts of Warangal, Medak, Nalgonda and Osmanabad. Insects appeared in parts of Warangal and Nalgonda. The crop, on the whole made good growth and was ready for weeding early in Shahrewar (July).

In Aban (September 1935) the monsoon weakened and only light showers fell. The change was welcome and the crop ripened in the warm weather and harvesting commenced in Aurangabad, Bir, and Nalgonda in the middle of Aban. The crop in Raichur continued to stand in need of moisture. The estimated yield of kharif crop is 66 per cent. of the normal as compared with 60 per cent. in the previous year.

(ii) *Abi* :—Cultivation of the crop commenced in due time favoured by the pre-monsoon showers. Sowing commenced as early as the first week of Amardad (June) in Karimnagar, Mahbubnagar, Nalgonda, Aurangabad, Raichur and Bidar. It sprouted well and gave promise of good crop. Weeding was done at intervals between the first week of Shahrewar (July 1935) and the middle of Mehri (August) 1935. From nurseries, seedlings were transplanted at the end of Shahrewar, (July). A hopper attack and a plant disease were reported from certain tracts of Karimnagar and Medak respectively and they continued from early Mehri (August 1935) to the middle of Aban (September 1935). A similar menace appeared in parts of Warangal, Nizamabad, and Raichur at the end of Aban (September 1935). The damage sustained was slight. The estimated yield was 56 per cent. of normal, as compared with 58 per cent. last year.

(iii) *Rabi* :—Rabi cultivation commenced in due time, Raichur being first to sow, the seed at the close of Mehri (August 1935) and in the first week of Aban (September). Rabi sowing was retarded in the few parts of Parbhani and Gulbarga on account of excessive falls. Subsequently it progressed unimpeded in all tracts of the country and the crop was being weeded in parts of Raichur when the year closed.

Sugarcane :—The crop had a normal season throughout, irrigation being available from tanks and wells and canals. The estimated yield was 71 per cent. of normal.

Market :—The average retail prices of wheat and jawar, which were $8\frac{1}{4}$ and $13\frac{1}{2}$ seers respectively at the beginning of the year, slightly fell to $9\frac{3}{4}$ and $14\frac{3}{4}$ seers per O.S. Rupee at the end of the year. The price of rice, however, went up from $8\frac{1}{2}$ seers to $7\frac{1}{4}$ seers during the same period.

Agriculture

(b)—Monthly Report on Cotton 1344 Fasli

about and yield :—Acre
as the total area under
as compared with 3.7
per cent. decrease.

yield is estimated at 419,402 b.
570,822 bales in the correspondi
ing year. The decrease in yield is
the reduction in acreage but to the
soon. It is too early to estimate the
crop. The comparative figures are shown

MONTHLY COTTON REPORT.

AZUR 1344 FASLI.

Weather and crop condition :—The first three weeks of the month of report were characterised by light showers, sporadic in parts. More soil moisture was needed both for the kharif crop which was in boll-forming stage and also for the sowing of Rabi in the Telingana area. Kharif cotton in Gulbarga and Raichur was hard hit and began to wither in parts of the above districts. Rabi sowing was deferred in some areas of Raichur, where the early sown tender crops languished. Thus the general crop condition was identical with that in the previous year. During the last week of the month, heavy showers fell in Raichur and relieved the anxiety of the growers. Kharif prospects improved and rabi sowing was resumed. In the other parts of the Dominions, light to moderate rain in the same week was a desideratum. The condition of the kharif crop was fair and rabi sowing was in general progress when the month closed. The average rainfall for the month was 2.59" as compared with 3.02" and 2.56" respectively in the corresponding period of 1343 and 1342 Fasli.

<i>Average Rainfall (In inches)</i>		
	In Azur	Progressive total
1344 F. ..	2.59	29.90
1343 F. ..	3.02	37.46
1342 F. ..	2.56	29.87

Area, annawari and yield :—According to the last forecast returns, the total area under kharif and rabi is 2,978,505 acres, as compared with 3,657,023 acres in 1343 F. or 18 per cent. decrease.

Probable yield is estimated at 419,402 bales, as compared with 570,322 bales in the corresponding period of the preceding year. The decrease in yield is not proportionate to the reduction in acreage but to the caprice of the monsoon. It is too early to estimate the condition of rabi crop. The comparative figures are shown below :—

Area	2,978,505	3,657,023	3,504,032
<i>Trade classification :—</i>			
Gaorani	831,525	959,293	882,557
Oomras	1,840,997	2,145,352	2,194,310
Westerns & Northerns ..	279,690	521,949	400,616
Cocanadas	26,193	30,429	26,549

*Market value :—*Both the Nander and Jalna markets have not yet reopened for business.

Bombay market quotation on 2nd November (28th Azur 1344 F.) for Broach cotton was B.G. Rs. 208-4-0 for a khandy of 784 lbs. or Rs. 74-6-0 per palla of 140 seers indicating a fall in the price of previous month *viz.* Rs. 75-14-0.

*Export :—*In the month of Aban 1343 F., 5,562 bales were transported by road and rail as compared with 3,730 bales in the corresponding month of 1342 F.

*Pressing :—*In Azur 2,292 bales were pressed. as against 1,481 bales in the same period last year.

*Mill consumption :—*Local mills consumed in the month of report 1,349,257 lbs. or 3,373 bales of 400 lbs. each, as contrasted with 1,164,562 lbs. or 2,911 bales in Azur 1343 F.

NO. 2. DAI 1344 FASLI.

*Weather and crop condition :—*The month of Dai was practically dry except for a few cents of rain in most parts at the beginning of the month. Bir, Gulbarga, Osmanabad and Bidar remained rainless. The condition of the kharif crop was fair as was reported in Azur and picking commenced in some places. Rabi sowing continued in parts and young crop in others was growing satisfactorily.

*Area, annawari and yield :—*Since the last report no more returns of area have been received hence the acreage is the same as was shown in the previous report, namely, 2,978,505 (acres). Rabi sowing not being complete, more returns of areas will be available later.

Average Rainfall in inches

	In Dai Progressive total	
1344 F. ..	0.25	30.15
1343 F. ..	1.22	38.68
1342 F. ..	1.53	31.40

There being no variation in the condition of the kharif crop, the probable yield remained unchanged at 419,402 bales, as compared with 570,322 bales in the corresponding period of 1343 Fasli. The comparative figures are shown below :—

(In Acres)

	1344 F.	1343 F.	1342 F.
Area	2,978,505	3,657,023	3,504,082
<i>Trade classification :—</i>			
Gaorani	831,625	959,293	882,557
Oomras	1,840,997	2,145,352	2,194,310
West. & North.. ..	279,690	521,949	400,616
Cocanadas	26,193	30,429	26,549

*Market value :—*Jalna quoted for Havri Kapas Rs. 22-4-0 per palla of 140 seers on the 6th Dai. The price steadily advanced to Rs. 29 on the 25th and dropped to Rs. 27-8-0 on the last day of the month. The price on the corresponding date last year was Rs. 17-4-0.

The Nander market has not yet opened for business.

The Bombay rate for a khandy (784 lbs.) of Broach cotton was B.G. Rs. 224-8-0 or Rs. 80-3-0 per palla of 140 seers on 7th December (3rd Bahman), the price on the corresponding date of the previous month being Rs. 74-6-0.

*Export :—*5,833 bales of cotton were moved by road and rail during the month of Azur, as compared with 4,937 bales in the same month of the preceding year.

*Pressing :—*In Dai 2,671 bales were pressed, as compared with 15,277 bales in the same period last year; the total bales pressed since 1st Azur being 4,963.

*Mill consumption :—*In the month of report 1,303,011 pounds or 3,257 bales of cotton were consumed, as against 1,100,797 lbs. or 2,754 bales in the corresponding month of last year. The total consumption since Azur amounted to 6,630 bales.

NO. 3. BAHMAN 1344 FASLI.

Weather and crop condition :—No peculiarities characterised the weather conditions during the month of report. It was cold and dewy at nights. Occasional clouds, however, were not favourable to the standing crop in a few parts of the districts of Aurangabad and Bir.

Kharif cotton is still being picked in parts and rabi is growing well except in parts of Raichur on account of protracted draught.

Area, annawari and yield :—The area and yield figures remained the same as reported last month since no fresh returns have been received from the districts, viz. 2,978,505 acres and 419,402 bales respectively, as compared with 3,657,023 acres and 570,322 bales in the corresponding period of last year. The comparative figures are given below :—

(In Acres)

	1344 F.	1343 F.	1342 F.
Area	2,978,505	3,657,023	3,504,082
<i>Trade classification</i> :—			
Gaorani	881,625	959,293	882,557
Oomras	1,840,997	2,145,352	2,194,310
West & North ..	279,690	521,949	400,616
Cocanadas	26,193	30,429	26,549

Market value :—The Jalna market for Havri kapas was nervous in the beginning. Commencing at Rs. 28-6-0 per palla of 140 seers on 1st of the month, the price advanced to Rs. 30 on the 9th day. It then dropped and rose within narrow limits until the 18th when it improved to Rs. 30-12-0. Thereafter it steadily rose

and stood at Rs. 34-8-0 on the last day of the month. The price on the corresponding date of last year was Rs. 17-2-0.

The Nander market, which opened with Rs. 171-4-0 for a khandy of 800 seers of Bani kapas and Rs. 155 of Havri kapas, on the 1st Bahman, steadily improved to Rs. 205-8-0 and 186-4-0 respectively on the last day of the month, as compared with Rs. 116-8-0 and Rs. 101 respectively in the middle of Bahman 1343 Fasli.

The Bombay rate for a khandy (784 lbs.) of Broach cotton was B.G. Rs. 242-4-0 or B.G. Rs. 86-8-3 per palla of 140 seers on 4th January (1st Isfandar), the price on the corresponding date of the previous month being Rs. 80-3-0.

Export :—3,767 bales of cotton moved by road and rail during the month of Dai, as compared with 15,675 bales in the same month last year.

Pressing :—In Bahman 26,469 bales were pressed, as compared with 52,073 bales during the corresponding period of last year ; the total bales pressed since 1st Azur 1344 F. being 31,432 bales.

Mill consumption :—In the month of report 1,462,423 lbs. or 3,656 bales of cotton were consumed, as against 1,159,078 lbs. or 2,898 bales in the corresponding period of last year. The total consumption since Azur 1344 F. amounted to 10,286 bales.

NO. 4. ISFANDAR 1344 FASLI.

Weather and crop condition :—The weather was generally warm ; but a few cents of rain fell in most parts of the Dominions in the last week of the month of report, when picking of kharif cotton had almost been completed. Rabi, which was in boll-forming stage, slightly suffered from the rains in some parts of Karimnagar Adilabad, Medak, Nizamabad, Aurangabad, Gulbarga, Raichur and Bidar.

Rainfall (in inches)

	In	Progres-
	Isfandar	sive total
1344 F. ..	0.67	30.82
1343 F. ..	0.08	39.11
1342 F. ..	0.27	31.67

Area, annawari and yield :—Since the last report more complete returns of acreage have been received, the total area being 3,078,789 acres (3.3 per cent. more than in Bahman 1344 F.), as compared with 3,681,340 and 3,593,479 acres in the corresponding periods of 1343 F. and 1342 F. respectively. Comparative figures of area under cotton according to Trade description are given below :—

(In acres)

	1344 F.	1343 F.	1342 F.
<i>Trade classification :—</i>			
Gaorani	868,306	976,273	889,588
Oomras	1,861,022	2,143,058	2,222,109
West & North	319,696	524,915	448,109
Coconadas	29,765	37,094	33,673

The yield is estimated at 438,237 bales, as compared with 561,367 bales in the previous year and 533,043 bales in 1342 Fasli.

Market value :—The Jalna market for Havri kapas was unsteady. From Rs. 34-8-0 on the last day of Bahman, the price of a palla of 140 seers slumped to Rs. 32 on the 4th of Isfandar. Although the rate thereafter improved and reached Rs. 34-8-0 on the 19th it fell to Rs. 32-4-0 on the 30th of the month. The closing price in Isfandar 1343 Fasli was Rs. 21-12-0.

The Nander market for Bani kapas was favourable. A khandy of 800 seers was quoted at 202-4-0 on the first and Rs. 214 (or Rs. 37-7-0 for a palla of 140 seers) on the last date of the month. Between these dates marked fluctuations took place, the price on the 21st of the month rising to Rs. 225-4-0 (or Rs. 39-7-0 for a palla of 140 seers) On the 30th Isfandar 1343 F. the price was Rs. 124.

In the same market the price of Havri kapas rose from Rs. 185 per khandy of 800 seers to Rs. 200 on the 21st and receded to Rs. 185 (or 32-6-0 per palla of 140 seers) at the close of the month. On the corresponding date of 1343 F. the rate was 113-4-0 (or Rs. 19-13-0 per palla of 140 seers.)

Bombay quoted on 1st February (29th Isfandar) for a khandy (784 lbs.) of Broach cotton (lint) B.G. Rs. 247-8-0 or B.G. Rs. 88-6-0 per palla of 140 seers, previous months price being B.G. Rs. Rs. 86-8-0. Last year the price was B.G. Rs. 70 on 26th January 1934 (24th Isfandar 1343 F.).

Export :—By road and rail 35,210 bales of cotton were exported during the month of Bahman, as compared with 58,347 in the corresponding period of 1343 Fasli. The present export figures seem to correspond with those of Bahman 1341 F. (33,530 bales).

Pressing :—During the month of report 70,431 bales were pressed, as compared with 74,740 bales in the corresponding month last year; the total bales pressed since 1st Azur 1344 F. being 101,863 bales.

Mill consumption :—1,548,353 lbs. or 3,871 bales of cotton were consumed in the local mills, as against 1,265,159 lbs. or 3,163 bales in the corresponding period of last year. The total consumption since 1st Azur 1344 F. amounted to 5,663,044 lbs. or 14,157 bales.

NO. 5. FARWARDI 1344 FASLI.

Weather and crop condition :—Warm weather prevailed

Rainfall (In inches)

	In	Progres-
	Farwardi	sive
		Total
1344 F. ..	0.0	30.82
1343 F. ..	0.01	39.12
1342 F. ..	0.86	32.53

during the month, except for a few showers accompanied by hailstorm in the first week in stray parts of Adilabad and Osmanabad where the standing crop was reported to be slightly affected.

Area, annawari and yield :—Since the last report there has been no change either in the acreage or the estimated quantitative yield of the crop, the area in acres being 3,078,789, as compared with 3,681,340 in the preceding year and 3,593,479 in 1342 Fasli. According to trade description the areas are as shown hereunder :—

Gaorani	868,306	976,273	889,588
Oomras	1,861,022	2,148,058	2,222,109
West & North	319,696	524,915	448,109
Coconadas	29,765	37,094	33,673

The estimated yield is 438,237 bales, as contrasted with 561,367 in 1343 F. and 533,043 in the year preceding it.

Market value :—The tone of the cotton markets in Jalna and Nander was weak. In the former, the rate of Havri kapas, which was Rs. 32-4-0 per palla of 140 seers on the last day of Isfandar, improved to Rs. 33-6-0 on the 4th of Farwardi and then steadily declined to Rs. 29-2-0 on the 27th of the month, the closing price being Rs. 30, as compared with Rs. 21 on the corresponding date of last year.

In Nander, the price of Bani kapas continued to fall in the month of report from Rs. 214-8-0 per khandy of 800 seers (Rs. 37-7-0 per palla of 140 seers) to Rs. 188 (Rs. 32-14-0 per palla of 140 seers) on the last day of the month, as compared with Rs. 128 per khandy or Rs. 22-6-0 per palla in the previous year.

Havri kapas was likewise poor in demand and the price dropped from Rs. 190-4-0 to Rs. 160 per khandy (Rs. 28 per palla) on the last date of the month. On the corresponding day of 1343 F. it was Rs. 112 per khandy (Rs. 19-9-0 per palla).

Bombay quoted for Broach B.G. Rs. 245-8-0 per khandy of 784 lbs. (Rs. 87-11-0 for a palla of 140 seers) on 27th Farwardi (1st March), last year's rate being B.G. Rs. 204 per khandy or B.G. Rs. 72-14-0 per palla.

Export :—By road and rail 69,274 bales of cotton moved during Isfandar, as against 96,174 and 87,528 bales in the corresponding month of 1343 and 1342 respectively.

Pressing :—In the month of report 53,114 bales were pressed, as compared with 44,572 in the corresponding month of last year. The total number of bales pressed since Azur (October last) is 154,977 bales.

Mill consumption :—The mills consumed 1,526,888 lbs. or 3,817 bales in Farwardi, as against 1,106,426 lbs. or 2,766 bales in the same month last year. The total consumption since 1st Azur (October last) is 7,189,932 lbs. or 17,975 bales.

No. 6. ARDIBEHISHT 1344 FASLI.

Weather and crop condition :—Hot weather prevailed during most part of the month.

Rainfall (In inches)

	In Ardi- behisht	Progressive total
1344 F. ..	0.71	31.53
1343 F. ..	0.13	39.25
1342 F. ..	0.10	32.63

In the last few days light showers fell in parts of almost all the districts. The rain proved inconsequential as the final picking of rabi cotton was about its close except in some late areas.

Area, annawari and yield :—The final figures for area and outturn are 3,100,801 acres, as compared with 3,695,686 in 1343 F. and 3,601,645 in 1342 F. and 442,584 bales as against 563,971 and 533,891 in 1343 and 1342 Fasli respectively.

The increase (compared with the last month) in figures in the case of both area and yield is due to receipt of more complete returns than for the previous report. The annawari estimate is 8 annas in this year as against 9 annas in the previous year as well as in 1343 Fasli. The comparative figures are as follows :—

Gaorani	864,266	976,273	889,588
Oomras	1,868,947	1,157,404	1,229,945
West & North	337,711	524,915	448,184
Cocanadas	29,877	37,094	33,978

Market value :—The cotton markets were weak, the prices of varieties steadily dropping to a low level.

In Jalna Havri kapas, which was quoted at Rs. 30-8-0 per palla of 140 seers on the first day of Ardebehisht, fell by small degress to Rs. 24-8-0 at the end of the first fortnight and improved to Rs. 26-4-0 on the last day of the month, the closing price of this variety in the same month of 1343 F. being Rs. 19-6-0.

In Nander a khandi of Bani kapas, which commanded Rs. 190-4-0 per khandi (Rs. 33-5-0 for a palla of 140 seers) declined in value to Rs. 151 (Rs. 26-7-0 per palla) on the 20th. The market thereafter transacted no business. Likewise Havri kapas traced its downward course from Rs. 160 per khandi (Rs. 28 per palla) at the beginning of the month to Rs. 130 (Rs. 22-12-0 per palla) on the 20th of the month.

Broach in the Bombay market was B.G. Rs. 224-8-0 per khandi of 784 lbs. (B.G. Rs. 80-3-0 per palla of 140 seers). On the corresponding date of last year the price was B.G. Rs. 196-12-0 (B.G. Rs. 70-4-0 per palla of 140 seers).

Export :—In Farwardi 66,569 bales of cotton moved by road and rail, as compared with 65,415 and 53,401 bales in the corresponding months of 1343 and 1342 F. respectively.

Pressing :—In the month of report 22,771 bales were pressed in the local factories, as contrasted with 19,013 in the same month last year, the total since the beginning of the season being 177,748 bales.

Mill consumption :—The mills consumed 1,565,020 lbs. or 3,912 bales in the month. The figure for the corresponding month of Ardebehisht 1343 is 1,124,345 lbs. or 2,810 bales, the total consumption since the beginning of the season being 8,754,952 lbs. or 21,887 bales.

1344 F.	864,266	1,858,947	337,711	29,877
1343 F.	976,273	2,157,404	524,915	37,094
1342 F.	889,588	2,229,945	448,134	33,978

3. *Market value* :—There was a little improvement in the tone of the market during the month. In Jalna the price of Havri kapas slowly advanced from Rs. 26-4-0 per palla of 140 seers at the end of last month to Rs. 29-8-0 on the last day of Khurdad. On the corresponding date of last year it was Rs. 17-8-0.

In Nander no business was done in Bani or Havri kapas. But the quotation for Bani cotton (lint) was Rs. 91 and Rs. 99-8-0 per palla of 142 seers on the first and the last days of the month, respectively. The closing price in Khurdad 1343 was Rs. 65.

Broach in the Bombay Market was quoted at B.G. Rs. 250-8-0 per khandy of 784 lbs. (or B.G. Rs. 89-7-0 per palla of 140 seers) on 3rd May (28th Khurdad), the price on the corresponding date of last year being B.G. Rs. 189-12-0 per khandy (or B.G. Rs. 67-12-0 per palla of 140 seers).

4. *Export* :—By road and rail 26,682 bales were exported in Ardibehisht, as compared with 28,312 in the same period last year and 42,971 in the year preceding.

5. *Pressing* :—25,440 bales were pressed during the month, as against 12,007 bales in the corresponding period of last year, the total bales pressed from the beginning of Azur is 203,188.

6. *Mill consumption* :—The local mills consumed 1,404,365 lbs. or 3,511 bales as contrasted with 1,146,147 lbs. (2,865 bales) in the same month last year. The total consumption since Azur 1344 F. is 10,159,317 lbs. or 25,398 bales.

No. 8. THIR 1344 FASLI.

Weather and crop condition :—There was no crop standing in the month of report. The local showers, which fell in stray regions averaging thirteen cents, were useful for the preparation of kharif lands.

Rainfall (In inches)

	In Thir	Progres- sive total
1344 F. ..	0.13	32.42
1343 F. ..	0.18	40.09
1342 F. ..	4.11	37.98

Area, annawari and yield :—The final figures as reported last month are as shown below and the area classified according to trade description of cotton is :—

year	Area in acres	Yield in bales	Annawari
1344 F. ..	3,100,801	442,584	8
1343 F. ..	3,695,686	563,971	9
1342 F. ..	3,601,645	533,891	9

year	Gaorani	Oomras	W. & N.	Cocanadas
1344 F. ..	864,266	1,868,947	337,711	29,877
1343 F. ..	976,273	2,157,404	524,915	37,094
1342 F. ..	889,588	2,229,945	448,134	33,978

Market value :—Jalna market was unsteady for Havri kapas. From Rs. 29-4-0 per palla of 140 seers on the first of the month, the price steadily advanced in the first

fortnight and touched Rs. 31 on the 15th and thereafter it slowly retraced its downward course to Rs. 28-8-0 on the 31st of the month. On the last day of the same month last year the rate was Rs. 21.

Nander quoted for Bani cotton (Lint) Rs. 98 per palla of 142 seers on the 1st day and Rs. 96 on the last day of the month. During the intervening days the price fluctuated, touching Rs. 97 at the end of the first week and rising to Rs. 100 in the third week. The final rate in the same month 1343 Fasli was Rs. 71, as against Rs. 71-4-0 in 1342 Fasli.

Broach cotton in Bombay was B.G. Rs. 227-8-0 per khandy of 784 lbs. or B.G. Rs. 81-4-0 per palla of 140 seers, on 7th June, (1st Amardad), as compared with B.G. Rs. 71-7-0 on 27th Thir (1st June) last year.

Export :—26,450 bales of cotton moved by road and rail during the month of Khurdad, as compared with 22,303 and 42,006 in the same month of 1343 and 1342 Fasli, respectively.

Pressing :—25,335 bales were pressed in Thir, as against 12,567 in the corresponding period of 1343 Fasli, the total since the beginning of Azur 1344 F. being 228,523 bales.

Mill consumption :—1,589,294 lbs. or 3,973 bales were consumed in the month of report, as compared with 977,146 lbs. or 2,443 bales in Thir 1343 F. the total consumption since 1st Azur 1344 F. being 11,748,611 lbs. or 29,371 bales.

NO. 9. AMARDAD 1344 FASLI.

The monsoon burst in proper time and yielded general rainfall. The Marathwara districts, which constitute the principal kharif cotton area, were more favourably treated than the others.

*Rainfall (In inches) from 16th
Thir to end of Amardad.*

In Amardad

1344 F.	..	8.00
1343 F.	..	6.29
1342 F.	..	9.75

Aurangabad district received during the month of report as much as 12.69 inches, or 112 per cent. more than the fall in the corresponding period of 1343 Fasli. Bidar too, had a good supply amounting to 11.11", as compared with 4.54" in the same month last year. while Bir reported 10.83", as con-

trusted with 4·19" in the previous year. In the other districts of the State rainfall averaged between 3·01" in Baghat, 3·99" in Nalgonda, and 9·91" in Adilabad. The average for the Dominions was 7·98" as against 6·20" and 7·30" in the corresponding month of 1343 and 1342 Fasli respectively.

In many parts, the showers which usually precede the monsoon, were absent. Consequently final preparation of the land of kharif and actual sowing of cotton commenced only with the rains of the regular monsoon. At the end of the month, land in a few places was still under preparation, sowing was in progress in a large area and sprouts were seen above ground in other parts. The condition of the tender crop was reported to be generally good, the soil moisture being adequate.

In Baghat and in Deverkonda and Huzurnagar (Nalgonda) more rain was awaited for sowing.

Area, annawari and yield :—Conditions being favourable 1,420,188 acres, or 96 per cent. more than the area for the corresponding period of last year, have been sown cotton. Sowing is still proceeding and therefore, a further increase in acreage may be anticipated in the next report. The area is shown as follows : -

In acres

1345 F.	1344 F.	1343 F.
1,420,188	745,147	2,503,369

According to the new classification of cotton by trade description, the area of the current year falls under the following categories :—

Classification according to new scheme	Hyderabad Oomras	Hyderabad Gaorani	Raichur Kumpta & upland	Western	Warangal and Coconadas
1345 F. ..	637,466	725,460	1,319	7,532	48,411
1344 F. ..	184,262	510,496	2,355	7,253	40,781

Market value :—The Jalna market closed for the season on the 11th Amardad. Two days prior to this no transaction was done in Havri kapas, the price of which during the 1st week of the month averaged Rs. 28-4-0 per palla of 140 seers. On the 4th of the same month last year the rate was Rs. 22-10-0.

The Nander market did business in Bani cotton only during the month of report, the opening and closing prices being Rs. 96-4-0 and Rs. 97 per palla of 142 seers, respectively. The final quotation in the corresponding month of last year was Rs. 71, and that in the year before last was Rs. 72-4-0.

Broach in Bombay ruled at B.G. Rs. 227-12-0 per khandy of 784 lbs. or B.G. Rs. 81-5-5 per palla of 140 srs. on 28th June 1935 (22nd Amardad 1344 F.) as against B.G. Rs. 73-7-0 per palla, about the same period last year.

Export :—In the month of Thir 30,587 bales moved by road and rail, as compared with 17,022 in the same month 1343 and 27,201 in 1342 Fasli.

Pressing :—9,872 bales of cotton were pressed during the month of report, as contrasted with 10,114 bales in the corresponding period of 1343 F. Total since the beginning of Azur is 238,395 bales.

Mill consumption :—The local mills used 1,468,889 lbs. (3,672 bales) in Amardad, as compared with 928,066 lbs. (2,320 bales) in the same month last year. Total mill consumption from the beginning of the year is 13,217,500 lbs. (33,044 bales).

NO. 10. SHAHREWAR 1344 FASLI.

The monsoon was inactive during the first week of the month and the fall was uneven—except in Adilabad district. The month in Raichur went wholly dry while in seven other districts the average did not amount to even an inch. More rains were desired to help further sowing in Warangal, Medak, Nalgonda, Osmanabad and Raichur. Rainfall in the second week was more encouraging and well distributed in all parts (except Aurangabad). Seed-

Rainfall (In inches)

	In Shah- rewar	Progres- sive total
1344 F. ..	6.89	14.89
1343 F. ..	11.03	17.82
1342 F. ..	9.31	19.06

ing operations continued and the early sown crop looked

well. In the following week the Western sector fared ill, the district average in that area being less than an inch. More moisture was needed both for the germination and growth of the seed already sown and for that of the sprouts in parts of Nalgonda and Osmanabad. During the rest of the month the monsoon was weak and rainfall poor, the principal cotton districts recording not even an inch a week on the average. Crop in Kallam and Parenda (Osmanabad) and Gangawati and Sindhnur (Raichur District) was in distress for lack of moisture. At the end of the month the record of the rainfall showed 6·89 inches, as compared with 11·03 inches in the same month last year. Taking as a whole the crop appeared well and the early sown crop was being weeded.

*Area, annawari and yield :—*Due to receipts of more returns the area under cotton at the end of the month increased by 20,759 acres or 1·5 per cent. upon the first report and 93·4 per cent. on the corresponding period of last year. Comparative better seasonal conditions warranted a larger area being brought under cotton now than in the preceding year. It is too early to determine the anna

estimate of the crop.

Distributed according to Trade Description of cotton, the area falls under the following categories :—

Gaorani	727,725	685,840	925,564
Oomras	696,823	325,641	1,521,118
Western & Northernss	7,405	11,441	35,384
Cocanadas	8,994	9,224	21,358

*Market value :—*Throughout the month of report Nander market for Bani lint was stationary at Rs. 97. Last year's closing price of the corresponding month was Rs. 73 per palla of 142 seers, as against Rs. 71 of the year before last. Jalna market remained colsed.

Broach in Bombay quoted at B.G. Rs. 229 per khandy of 784 lbs. (or B.G. Rs. 81-12-0 per palla of 140 seers) on

2nd August (26th Shahrewar). Last year's price on the corresponding date was B.G. Rs. 228-12-0 per khandy or B.G. Rs. 81-11-0 per palla, as against B.G. Rs. 73-7-0 of the year before last.

Export :—12,644 bales, as compared with 25,396 bales in the same month last year, were exported from the State in Amardad. Total export since Azur 1344 F. is 277,116 bales.

Pressing :—In the month of report 7,642 bales were pressed, as against 10,185 in Shahrewar last year, the total from the beginning of the season (Azur/October 1934) being 246,037 bales.

Mill consumption :—1,791,220 lbs. or 4,478 bales were consumed in local mills, as compared with 1,124,387 lbs. or 2,811 bales in Shahrewar last year. Total mill consumption since Azur is 15,008 lbs. or 37,522 bales.

NO. 11. MEHIR 1344 FASLI.

Weather :—The monsoon in the first week of the month of report was weaker than in the preceding week. Only scattered showers fell and the average was only 5 cents. The spell of a fortnight of droughty weather ceased the growing crop in weeding stage to droop in parts of Nander, Gulbarga, Osmanabad, Raichur, Bidar and Nalgonda, while in other areas the need of rain was imperative.

Rainfall (In inches)

	In Meher	Progres- sive total
1344 F. ..	8.16	23.05
1343 F. ..	6.28	23.60
1342 F. ..	7.06	26.12

During the rest of the month the monsoon strengthened and a weekly average of $2\frac{3}{4}$ inches of rain fell. Though it was all unevenly distributed yet the crop in general revived, except in some tracts, notably in Raichur district. At the close of the month, soil moisture was reported to be insufficient for the crop in a few parts of Warangal, Karimnagar, Nizamabad and Nalgonda.

The average fall in the month was 8.16", as compared with 6.28" in the corresponding month, last year.

Area, annawari and yield :—More returns having been received since the last report, the area under cotton has advanced to 2,874,817 acres, as against 2,615,646 in the corresponding period of the preceding year, an increase of 99.5 per cent. on the previous month's figure and 9.5 per cent. on the preceding year.

The condition of the crop is fair to good in general.

It is too early to estimate the probable yield of the crop.

Classified according to trade description the area falls under the following categories :—

Gaorani	856,692	833,395	928,117
Oomras	1,882,063	1,669,572	1,990,991
Westerns & Northerns	125,269	91,882	265,686
Cocanadas	10,793	20,797	21,854
Total	2,874,817	2,615,646	3,206,648

Market value :—At Nander, Bani cotton's opening price of Rs. 97 per palla of 142 seers depreciated to Rs. 95 on the 19th of the month, when the market was closed for the season. The price on the last date of the corresponding month, last year, was Rs. 81.

The Jalna market remained closed during the month.

In Bombay, Broach cotton was quoted on 5th Sept. (29th Mehir) at B.G. Rs. 193 per khandy of 784 lbs. (B.G. Rs. 69 per palla of 140 seers), as compared with Rs. 225 per khandy (B.G. Rs. 80-6-0 per palla) on the corresponding date, last year.

Export :—Export by road and rail in Shahrewar amounted to 6,113 bales, as against 15,059 and 11,125 in the corresponding month of 1343 and 1342 F. respectively. Total export since Azur 1344 F. is 282,229 bales.

Pressing :—In the month of report, only 908 bales were pressed, as against 4,630 bales in the same month last year, total since Azur being 246,945 bales.

Mill consumption :—Mills consumed during the month 1,837,535 lbs. of cotton (4,594 bales), as against 1,346,372 (3,366 bales) in the same period last year, the total since Azur being 16,846,255 lbs. (42,116 bales).

No. 12. ABAN 1344 FASLI.

During the first week of the month light to moderate rain fell, replenishing the soil moisture needed for the crop in parts of Warangal, Karimnagar, Nizamabad and Nalgonda as reported previously. In some regions of Nander and Bidar excessive moisture tender to discolour the plants, while the crop condition in Deodrug (Raichur District), where only a few showers fell, caused anxiety.

Rainfall (In inches)

	In Aban	Progres- sive total
1344 F. ..	5.86	28.91
1343 F. ..	4.33	27.93
1342 F. ..	8.02	34.14

In other parts of that district rabi cotton sowing began. In the second week of the month rainfall was general but Raichur went dry. In Marathwara the fall was so heavy that a break was desired for facilitating weeding of late-sown crop and for picking of early cotton which actually commenced at intervals in Aurangabad and Bir. During the second half of the month only light rain fell in parts and it was a welcome change generally, while in Raichur the crop showed signs of deterioration for lack of moisture.

The average rainfall for the month was 5.86" as compared with 4.33" in the same month last year. At the end of the month, cotton was being picked in parts of Marathwara and rabi sprouted in some places of Raichur, doing well, while sowing was in progress in the same district and in Gulbarga and Nalgonda.

Area, annawari and yield :—No more returns have been received since the last report : hence the area is the same as in the previous month, viz. 2,874,817 acres as compared with 2,615,646 acres in the previous year, an increase of 9.5 per cent.

The estimated condition of the crop is 10 annas, as against 8 annas in the preceding year.

Classified according to trade description the area is as follows :—

Gaorani	856,833	833,395	928,117
Oomras	1,882,063	1,669,572	1,990,991
Westerns & Northerns	125,269	91,882	265,686
Cocanadas	10,793	20,797	21,854
Total	2,874,817	2,615,646	3,206,648

Market value :—The Jalna and Nander markets remained closed for the season. The Bombay rate for Broach cotton on 4th October (28th Aban 1344 F.) was B.G. Rs. 216 per khandy of 784 lbs. or B.G. Rs. 77-2-0 per palla of 140 seers, as against B.G. Rs. 75-11-0 on the corresponding date last year.

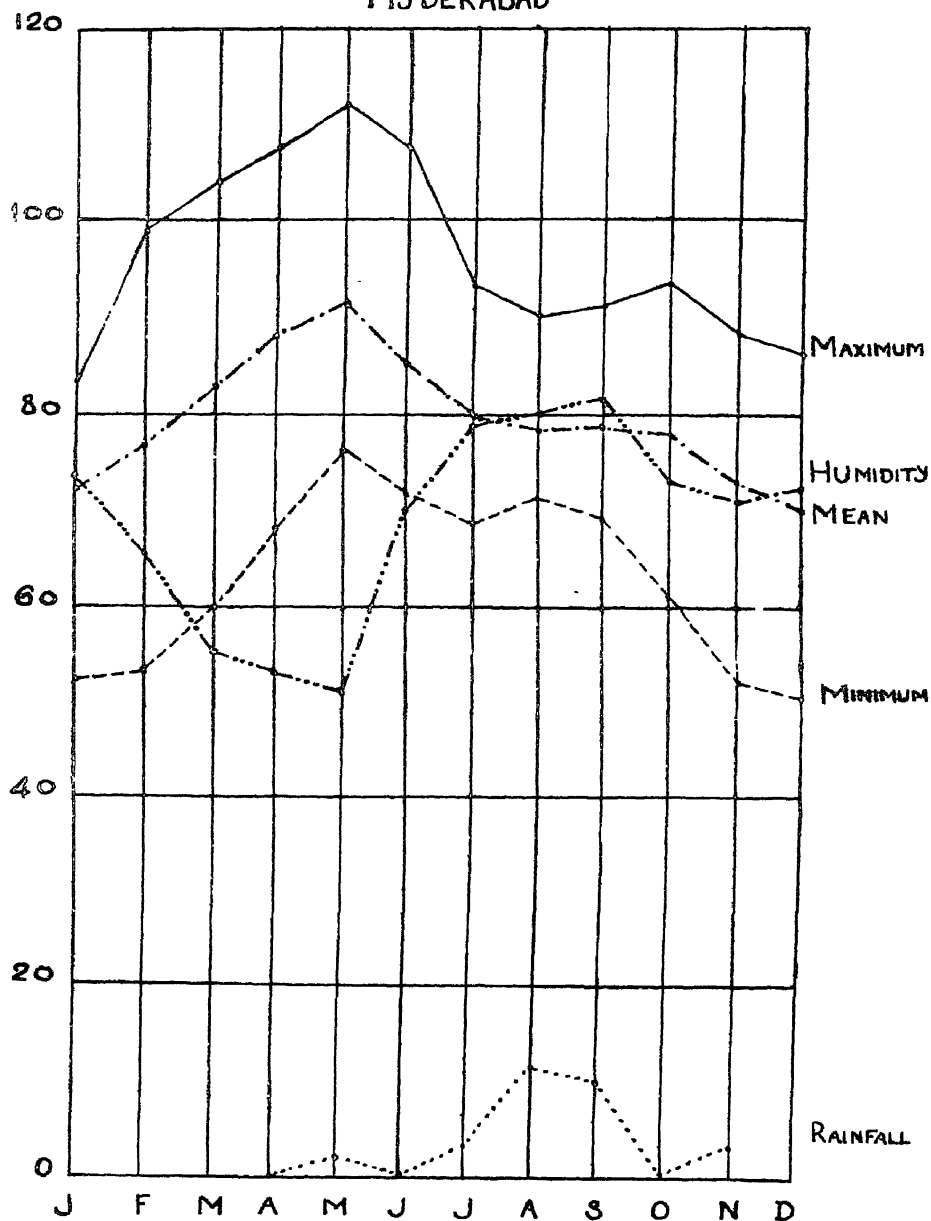

Export :—By road and rail 3,202 bales of cotton moved in Mehir 1344 F. as against 11,805 in the same month 1343 F. Total for the year is 285,431 bales.

Pressing :—473 bales were pressed in the local factories as compared with 4,483 in the same month last year, the total for the year being 247,418 bales.

Mill consumption :—Mills consumed in the month of report 1,790,353 lbs. representing 4,476 bales, as against 1,388,952 lbs. or 3,472 bales in the corresponding period of last year. Total consumption since Azur 1344 F. is 18,636,608 lbs. or 46,592 bales.

(c) Crop Forecasts 1344 Fasli

I. —COTTON

(On an average of five years ending 1934-36, the area under cotton crop in these Dominions represents 15.02 per cent. of the total area in India.)

This is the fifth or final forecast which gives the estimated area under cotton, kharif and rabi and also its probable outturn harvested or expected to be harvested.

The area is estimated at 3,697,749 acres as compared with 3,100,801 acres in the corresponding period last year, showing an increase of 596,948 acres or 19.25 per cent. while compared with the fourth forecast of this year there is an increase of 0.58 per cent.

The outturn in terms of bales is estimated at 569,252 bales as against 442,584 bales during the same period last year, showing an increase of 126,668 bales or 28.62 per cent. and compared with the fourth forecast there is a decrease of 52,824 bales or 8.49 per cent. due to damage caused by the October rains in the cotton growing districts.

The detailed statements and classified figures are as follows :—

II. --WHEAT

(On an average of five years ending 1932-33, the area under wheat cultivation in these Dominions has represented 3.6 per cent. of the total area under wheat in India).

This is the fifth or final forecast and deals with the area under wheat and its estimated outturn.

The total area is estimated at 1,258,783 acres as against 1,201,152 acres during the corresponding period of last year, showing an increase of 57,631 or 4.80 per cent.

The outturn is estimated at 155,853 tons, as against 148,760 tons in the same period of last year, showing an increase of 7,093 or 4.77 per cent. The increase in area and outturn, as already stated in the fourth forecast, is due to favourable seasonal conditions.

The detailed statement is shown on the next page.

III.—RICE.

(On an average of five years ending 1933-34, the area under rice in these Dominions represents 1.11 per cent. of the total area under rice in India).

This is the final forecast and deals with the area sown under rice and the quantitative outturn harvested or expected to be harvested.

The area is estimated at 1,063,929 acres, as against 1,183,564 acres during the same period last year, showing a decrease of 119,635 acres or 10.11 per cent. And when compared with the third forecast it shows an increase of 15.37 per cent. due to receipt of more returns for tabi.

The outturn is estimated at 335,719 tons, as compared with 355,034 tons during the corresponding period of last year, showing a decrease of 19,315 tons or 5.44 per cent. The yield has improved in contrast to acreage as a result of favourable seasonal conditions during the growing and subsequent stages, as already stated in the previous forecast.

The detailed statement is shown on next page.

IV.—JAWAR.

(On an average of five years ending 1933-34, the area under jawar in these Dominions represents about 26.86 per cent. of the total area under jawar in India).

This is the final forecast which deals with the area under jawar and the estimated outturn, harvested or expected to be harvested.

The total area is estimated at 8,799,032 acres, as against 8,892,078 acres during the corresponding period of last year, showing a decrease of 93,046 acres or 1.05 per cent. And when compared with the third forecast there is an increase of 2,016,272 acres or 29.72 per cent. due to receipt of more returns of tabi.

The outturn is estimated at 1,100,453 tons, as compared with 1,031,702 tons during the same period last year, showing an increase of 68,751 tons or 6.66 per cent. And in comparison with the third forecast there is an increase of 192,228 tons or 21.16 per cent. Though compared with the last year, the acreage has decreased yet the outturn returns an increase due to favourable seasonal conditions during the growing and subsequent stages.

The detailed statement is appended on the next page.

V.—SESAMUM.

(On an average of five years ending 1933-1934, the area under sesamum crop in these Dominions represents 9.81 per cent. of the total area in India).

This forecast deals with the estimated area under sesamum and the quantitative outturn harvested or expected to be harvested.

The area is estimated at 587,753 acres, as against 509,130 acres during the corresponding period of last year, showing an increase of 78,623 acres or 15.44 per cent.

The outturn is estimated at 35,279 tons, as against 21,677 tons in the same period last year, showing an increase of 13,602 tons or 62.75 per cent.

The increase in outturn is due to favourable prospects of the crop as a result of seasonable conditions.

The detailed statement is shown on overleaf.

VI.—LINSEED AND MUSTARD.

(On an average of five years ending 1933-34, the area under linseed and mustard crops in these Dominions represents about 9.17 and 0.17 per cent. respectively of the total area under these crops in India.)

This final forecast deals not only with the area of linseed and mustard crops but also with the quantitative outturn harvested or expected to be harvested.

The area and yield under the above crops as compared with the last year are as follows :—

Crops	ACREAGE			OUTTURN		
	Current year	Previous year	P.C. of variation	Current year	Previous year	P.C. of variation
1	2	3	4	5	6	7
Linseed ..	415,614	398,718	+ 4.24	33,402	33,615	— 0.64
Mustard ..	13,187	11,527	+13.97	602	470	+28.09
Total ..	428,751	410,245	+ 4.51	34,004	34,085	— 0.24

The total area is estimated at 428,751 acres, as compared with 410,245 in the corresponding period of last year, showing an increase of 18,506 acres or 4.51 per cent. And when compared with the second forecast there is an increase of 7.47 per cent. due to receipt of further returns.

The outturn is estimated at 34,004 tons, as against 34,085 tons in the same period last, showing a decrease of 81 tons or 0.24 per cent. due to unfavourable seasonal conditions affecting the linseed crop.

The detailed statements are as follows :—

VII.—GROUNDNUT.

(On an average of five years ending 1933-34, the area under groundnut crop in these Dominions represents 13.78 per cent. of the total area in India.)

This forecast deals with the estimated area under groundnut and the quantitative outturn harvested or expected to be harvested.

The area is estimated at 1,059,445 acres, as against 961,537 acres during the corresponding period of last year, showing an increase of 97,908 acres or 10.18 per cent. and compared with the second of this year, the increase works out at 21.45 p.c. due to receipt of further returns.

The outturn is estimated at 286,901 tons, as compared with 224,432 tons during the same period last year, showing an increase of 62,469 tons or 27.83 per cent.

The increase in area and outturn is due to favourable seasonal conditions.

VIII. CASTOR AND MISCELLANEOUS.

(On an average of five years ending 1933-34, the area under castor crop in these Dominions represents about 47.72 per cent. of the total area under this crop in India)

This final forecast deals not only with the area occupied by the castor crop and the miscellaneous crops but also with the quantitative outturn, harvested or expected to be harvested.

The area under different oil seeds as compared with those in the previous year is as follows :—

Crops	AREA IN ACRES		Percent- age of varia- tion	OUTTURN IN TONS		Percent- age of varia- tion
	Current year	Previous year		Current year	Pre- vious year	
1	2	3	4	5	6	7
Castor	838,501	785,675	+6.09	57,297	47,047	+21.78

Total ..	1,395,241	1,246,215	..	74,949	59,743	..

The total area is estimated at 1,395,241 acres, as compared with 1,246,215 during the same period last year, showing an increase of 149,026 acres or 11.95 per cent. And when compared with the last forecast, there is an increase of 80.62 per cent., due to receipt of more acreage brought under plough subsequently.

The outturn is estimated at 74,949 tons, as against 59,743 tons during the corresponding period of last year, showing an increase of 14,956 tons or 25.46 per cent. due to favourable seasonal conditions.

IX. SUGAR-CANE.

(On an average of five years ending 1933-34, the area under sugar-cane crop in these Dominions represents 1.29 per cent. of the total area in India.)

This is the third or final forecast and deals with the area under sugar-cane crop and its estimated outturn harvested or expected to be harvested.

The total area is estimated at 58,505 acres, as against 50,580 acres during the corresponding period of last year, showing an increase of 7,925 acres or about 15.67 per cent.

The outturn in terms of *gur* is estimated at 99,196 tons, as against 93,129 tons of last year, showing an increase of 6,067 tons or about 6.51 per cent.

The increase in area and outturn is due to extensive cultivation in the Nizamabad district under the Nizam Sagar canals.

The detailed statement is shown on next page.

Statement.

X. TOBACCO.

(On an average of five years ending 1933-34, the area under tobacco crop in these Dominions represents 6.28 per cent. of the total area in India.)

This forecast deals with the area under tobacco crop and gives its quantitative outturn harvested or expected to be harvested.

The total area is estimated at 71,562 acres, as against 74,501 acres of last year, showing a decrease of 3,939 acres or 5.29 per cent.

The outturn is estimated at 15,987 tons, as against 16,309 tons of the corresponding period of last year, showing a decrease of 322 tons or about 1.97 per cent.

The detailed statement is shown on next page.

OF H.E.H. THE NIZAM'S STATE RAILWAYS. (1934-35-A.D.)—(Contd.)

Total	Total earnings of the corresponding period of preceding year	Increase or decrease as compared with the corresponding period of the preceding year	Remarks
7	8	9	10
4,30,427	5,28,067	-97,640	Decrease mostly due to general trade depression.
4,89,953	4,99,698	-9,745	Do do do
5,07,287	5,24,693	-17,406	Do do do
4,31,468	4,67,069	-35,601	Do do do
3,86,625	4,78,289	-91,664	Do do do
4,26,298	4,57,572	-31,274	Do do do
3,74,423	5,02,791	-1,31,368	Do do do
4,98,834	5,57,023	-58,189	Do do do
6,60,741	6,43,011	+17,730	From this month (the Commencement of the Railway financial year) each period covers 10 days and not 8 days as hitherto. Increase mainly due to Bhadrachallam Festival.
6,03,236	6,76,993	-73,757	Decrease is due principally to failure of crops and unfavourable market rates.
6,19,556	6,27,245	-7,689	Do do do
6,24,031	6,34,033	-10,002	Do do do
6,22,895	6,63,216	-40,321	
6,52,027	7,26,661	-74,634	
5,51,764	6,65,518	-13,754	
5,38,406	5,92,929	-54,523	
5,05,613	5,69,556	-63,943	Decrease was due mainly to Pandharpur Jathra and to small despatches of rice and other seeds owing to less demand.

THE NIZAM'S STATE RAILWAYS. (1934—35) (Concl'd.)

Total	Total earnings or of the corresponding period of preceding year	Increase or decrease as compared with the corresponding period of the preceding year	Remarks
7	8	9	10
4,87,848	4,89,088	—1,745	
4,58,798	5,58,680	—99,882	
4,71,517	5,51,871	—88,354	Decrease was due mainly to reduced despatches of rice, castor-seed, cotton raw, linseed, ground-nuts and other oilseeds owing to unfavourable market rates.
4,20,291	4,55,651	—35,360	
4,37,998	4,72,405	—34,407	Decrease was due chiefly to reduced despatches of groundnuts and linseed to Bombay owing to restricted demand from over-seas.
4,54,511	5,84,655	—1,30,144	
3,88,833	5,22,083	—1,33,250	Decrease was due mainly to less number of passengers travelling by main line trains and to less despatches of castor-seed, jawar and other oilseeds to foreign markets.
4,61,802	5,11,625	—49,823	
5,46,866	5,34,175	+12,691	Increase was due mainly to sudden increase in prices of food-grains, etc.
